Revascularization of bifurcation lesions

Evald Høj Christiansen
Associate Professor (Cardiology)
Aarhus University Hospital,
University of Aarhus
Aarhus, Denmark

Dr. Christiansen is an interventional cardiologist. His main interest is chronic total occlusions, bifurcations, coronary multimodality imaging, physiologic evaluations of coronary artery disease, and TAVR. He has performed a series of studies in this area and has conducted many international multicenter clinical trials on interventional cardiology.

Universities in collaboration with Finnish Cardiac Society
